

# RUBBER CORNER GUARDS

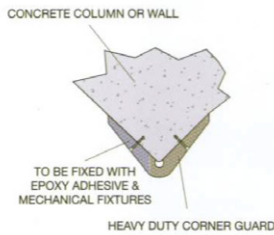

## FEATURES AND ADVANTAGES

Corner Guards are designed to give drivers the maximum visibility using black and yellow stripes, the correct hazard warning colours, The solid rubber buffer's wrap-around design protects your property corners, columns and entrances that are exposed to vehicle and warehouse traffic.

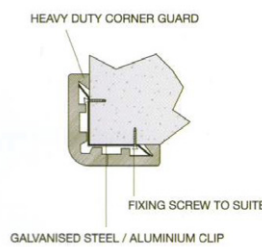

The corner guards can be securely fitted to concrete or brickwork, plain or plastered.

Our corner guards come in options of all-black rubber extrusion and/or with illuminated yellow strips on both arms of the guard. Our corner guards are designed to take the impact from vehicular hits. While the metal retainers protect the concrete wall against impact, the rubber protects the vehicles from getting damaged.

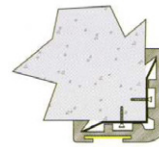

WARRIOR corner guards come in a wide range to suit specific requirements.
